

# ZoiPer

For  **ANDROID**

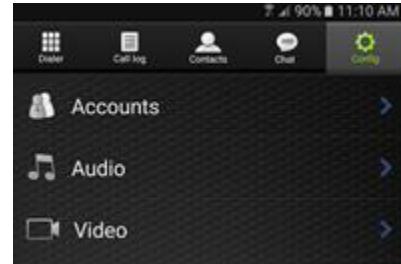

## Configuration

Launch your ZoiPer softphone client

From the top menu:  
select **Config**  
then select **Accounts**

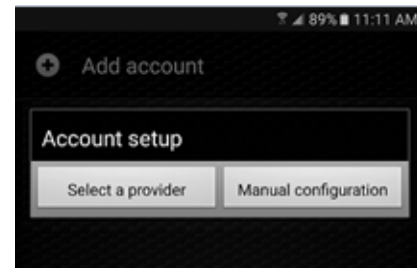

Select **Add account**,

Then click **Yes**  
(to the Do you already  
have an account question):

Select **Manual Configuration**:

Select **SIP**:

In the **SIP Account** section, complete the following fields:

Click **Account Name** and enter any name  
you wish to identify the connection  
ie: VBuzzer

Click **Host** and enter:

sip1-on.vbuzzer.com

Click **Username**:

Enter your VBuzzer Account ID\*

Click **Password**:

Enter your VBuzzer Account Password

\*not your VBuzzer Username  
(your username is used for accessing the VBuzzer User Portal).

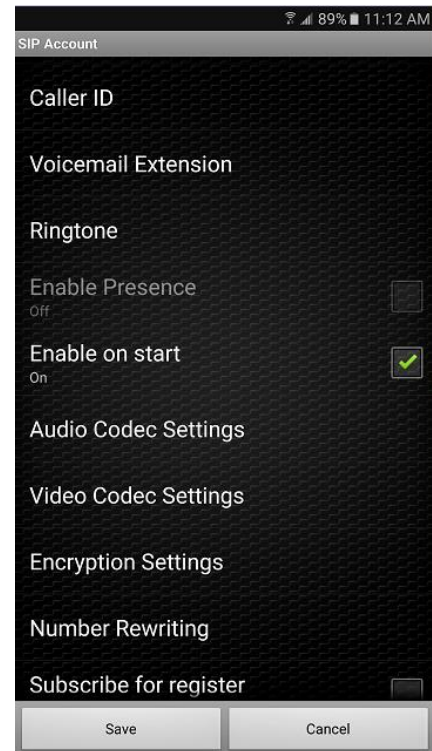

Scroll down and select **Voicemail Extension**:

Enter: \*97

Ensure **Enable on Start** is checked (on).

Click **Save**.

You should now be connected and ready to place calls on the VBuzzer network.
